- Erste Group is subject to the risk that liquidity may not be readily available.
- Rating agencies may suspend, downgrade or withdraw a rating of Erste Group Bank and/or a local entity that is part of Erste Group or a country where Erste Group is active, and such action might negatively affect the refinancing conditions for Erste Group Bank, in particular its access to debt capital markets.

- The Issuer is subject to the risk of changes in the tax framework, in particular regarding bank tax and the introduction of a financial transaction tax.
- The Issuer may not be able to meet the minimum requirement for own funds and eligible liabilities.
- The Issuer is obliged to contribute amounts to the Single Resolution Fund and to *ex-ante* financed funds of the deposit guarantee schemes; this results in additional financial burdens for the Issuer and thus, adversely affects the financial position of the Issuer and the results of its business, financial condition and results of operations.
- In future, the Issuer may be obliged to stop proprietary trading and/or separate certain trading activities from its core banking business.

- Changes in interest rates are caused by many factors beyond Erste Group's control, and such changes can have significant adverse effects on its financial results, including net interest income.
- Since a large part of Erste Group's operations, assets and customers are located in CEE countries that are not part of the Eurozone, Erste Group is exposed to currency risks.
- Erste Group Bank's profit can be lower or even negative.

- Erste Group Bank's major shareholder may be able to control shareholder actions.
- Compliance with anti-money laundering, anti-corruption and anti-terrorism financing rules involve significant costs and efforts and non-compliance may have severe legal and reputational consequences.
- Changes in consumer protection laws as well as the application or interpretation of such laws might limit the fees and other pricing terms that Erste Group may charge for certain banking transactions and might allow consumers to claim back certain of those fees and interest already paid in the past.
- The integration of potential future acquisitions may create additional challenges.

Risks related to the markets in which Erste Group operates

- The departure of any one or more countries from the Eurozone could have unpredictable consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Erste Group's business.

- Committed EU funds may not be released or further aid programmes may not be adopted by the EU and/or international credit institutions.

Key information on the key risks that are specific to the securities

RISK WARNING: Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. However, each investor's liability is limited to the value of his investment (including incidental costs).

Risk factors relating to an Index or Index Basket as reference asset

- Factors having a negative effect on the Performance of the Index may also affect the market price and Redemption Amount of the Notes which may lead to the loss of the entire invested capital or part of it.
- In case the Notes relate to a price index the performance of the Notes will not take into account dividends and other distributions, since they are not reflected in the price of such index.
- The Issuer has no influence on the existence, composition and calculation of the Index.
- Certain events in relation to the Index may result in an adjustment or early redemption of the Notes.
- The sponsor of the Index does not carry out any activity which affects the value of the Index and does not issue investment recommendations regarding the Index.
- If one or several components of the Index underlying the Notes are linked with emerging markets, a holder of securities must expect considerable political and economic uncertainty, which may considerably affect the price development of the Notes.
- Holders of securities do not have any rights to the components of the Index underlying the Index.
- Holders may be exposed to the risk that any changes to the relevant Index which qualifies as a benchmark index may have a material adverse effect on the value of and the amount payable under the Notes who are linked to a benchmark. Indices which are deemed "benchmarks" are the subject of recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may result in changes to such benchmarks and may cause a benchmark (including the relevant Index (if affected by these reforms)) to perform differently than in the past, or have other consequences which cannot be predicted. Investors thus face the risk that any such changes may have a material adverse effect on the value of and the amount payable under the Notes.

Risk factors relating to conflicts of interest

- The Issuer may engage in activities that could involve certain conflicts of interest and may affect the market price of the Notes.

Risks related to the pricing of the Notes

- The issue price of the Notes may include a margin on the mathematical (fair) market price of the Notes.
- Since the Issuer will, when determining the price of the securities on the secondary market, also take into account, in particular, the subscription fee (agio), the spread between bid and ask prices as well as commission and other fees in addition to the mathematical (fair) market price of the Notes, the prices quoted by the Issuer may considerably deviate from the fair market price of the Notes.

Risks related to Notes generally

- In the event that any Notes are redeemed prior to their maturity, a Holder of such Notes is exposed to risks that the Notes will be redeemed at the fair market price and the risk that he may only be able to reinvest the redemption proceeds in notes with a lower yield (Risk of Early Redemption).

- The General Conditions of the Notes provide for resolutions of Holders, certain rights of a Holder may be amended or reduced or even cancelled by way of resolutions, which could affect the Holder negatively.
- The General Conditions of the Notes provide for the appointment of a Joint Representative, a Holder may be deprived of its individual right to pursue and enforce its rights under the relevant Terms and Conditions of the Notes against the Issuer.
- An Austrian court can appoint a trustee (*Kurator*) for the Notes to exercise the rights and represent the interests of Holders on their behalf in which case the ability of Holders to pursue their rights under the Notes individually may be limited.
- Credit ratings of Notes may not adequately reflect all risks of the investment in such Notes, credit rating agencies could assign unsolicited ratings, and ratings may be suspended, downgraded or withdrawn, all of which could have an adverse effect on the market price and trading price of the Notes.
- The Notes are governed by Austrian law, and changes in applicable laws, regulations or regulatory policies may have an adverse effect on the Issuer, the Notes and the Holders.
- The Notes may be subject to write-down or conversion to equity upon the occurrence of a certain trigger event, which may result in Holders losing some or all of their investment in the Notes (statutory loss absorption).
- The Issuer may be subject to resolution powers which may also have a negative impact on the Notes.
- The Issuer is not prohibited from issuing further debt instruments or incurring further liabilities.
- In the case of the Issuer's insolvency, deposits have a higher ranking than the claims of the Holders under the Notes.

Risks related to the market generally

- Holders are exposed to the risk of partial or total inability of the Issuer to make interest and/or redemption payments under the Notes.
- Holders assume the risk that the credit spread of the Issuer widens resulting in a decrease in the price of the Notes.
- The Holder may be exposed to the risk that due to future money depreciation (inflation), the real yield of an investment may be reduced.
- There can be no assurance that a liquid secondary market for the Notes will develop or, if it does develop, that it will continue. In an illiquid market, a Holder may not be able to sell his Notes at fair market prices.
- No conclusion may be drawn from the indicated Aggregate Principal Amount in case of "up to" Notes.
- There is a risk that trading in the Notes or underlyings will be suspended, interrupted or terminated, which may have an adverse effect on the price of such Notes.
- Holders are exposed to the risk of an unfavourable development of market prices of their Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes.
- Exchange rate risks may occur, if a Holder's financial activities are denominated in a currency or currency unit other than the Specified Currency in which the Issuer will make principal and interest payments. Furthermore, government and monetary authorities may impose exchange controls that could adversely affect an applicable exchange rate.
- If a loan or credit is used to finance the acquisition of the Notes, the loan or credit may significantly increase the amount of a loss.

- Incidental costs related in particular to the purchase and sale of the Notes may have a significant impact on the profit potential of the Notes.
- Holders have to rely on the functionality of the relevant clearing system.
- The applicable tax regime may change to the disadvantage of the Holders; therefore, the tax impact of an investment in the Notes should be carefully considered.
- Legal investment considerations may restrict certain investments.

Risks related to taxes withheld in respect of U.S. withholding tax, including in respect of dividends, dividend equivalent payments

- Notes referencing one or more U.S. equities or equity indices may be subject to U.S. withholding tax according to Section 871(m) of the U.S. Internal Revenue Code of 1986. The Issuer will not make any additional payments to Holders of Notes to compensate them for any taxes withheld in respect of such U.S. withholding tax.

involving the Underlying for its proprietary accounts and for accounts under its management. Such transactions may have a positive or negative effect on the value of the Underlying or any other reference asset and consequently upon the market price of the Notes.

The Issuer may use all or some of the proceeds received from the sale of the Notes to enter into hedging transactions which may affect the market price of the Notes.

The Issuer may acquire non-public information with respect to the Underlying, and the Issuer does not undertake to disclose any such information to any Holder.
